

Name _____

Date _____

How to find the missing number

Count on from the number you can see.

Keep going until you reach the total.

$$3 + \square = 7$$

1. Start at 3, the number you can see.
2. Count on: 4, 5, 6, 7.
3. You counted on 4 times.
4. So the missing number is 4.

Fingers and counters are fine. There is no rush.
