

Name _____

Date _____

Word families with silent e

One ending makes lots of words.
Change the letter at the front and you get a new word.

b**ake****bake****c****ake****cake****l****ake****lake****t****ake****take**

1. The ending stays the same every time.
2. Only the letter at the front changes.
3. Say the ending first, then add the front letter.

Every ending here has a silent e, so the vowel says its own name.

Now you try

n + ine =

answer: nine

p + ine =

answer: pine
