

Name _____

Date _____

Adding to 20

Ten is the friend. Make ten, then add what is left.

8 + 5 Fill the first frame to 10 first.

$$8 + 5 = 13$$

8 green. 2 orange finish the ten. 3 orange are left. $10 + 3 = 13$.

The same jump on a number line

Start at 8. Jump 5. You land on 13.

See it on ten frames > Jump it > Make ten > Just write it

8 + 5 is 8 + 2 + 3. The 2 fills the ten.
 Counting on fingers runs out after 10. Making ten does not.
 Doubles help too: 7 + 8 is 7 + 7 and 1 more.
 The order can be swapped: 4 + 9 is the same as 9 + 4.
 Ask for the ten first, then the leftovers.
