

Name _____

Date _____

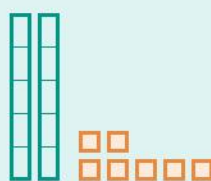

Comparing numbers to 100

Look at the tens first. Only then look at the ones.

34 and 27 3 tens beats 2 tens, so 34 is greater.

>

Which way does the sign point?

The open side always faces the bigger number.

45 > 41

45 is bigger

29 < 92

92 is bigger

60 = 60

the same

Count the tens > Then the ones > Point the sign > Check it

The open mouth of the sign faces the bigger number.

45 and 54 use the same digits but are not the same number.

A two digit number always beats a one digit number.

If the tens are equal, and only then, compare the ones.

Say it out loud: forty five is greater than forty one.
